

COOLING SYSTEMS

Green Stripe® straight coolant hose (Product type 4168)

This resistant and flexible radiator hose is perfect for general use on straight or slightly bent connections in heavy-duty vehicles. Approved for Marine applications.

- › Engineered to resist electrochemical degradation, the leading cause of hose failure
- › 2-ply bias fabric construction to maximise flexibility and strength
- › High-performance, high-temperature resistant reinforcement
- › Resists cold water leaks thanks to an advanced EPDM tube that stays soft and pliable, even under adverse operating conditions
- › Temperature range from -40°C to +135°C
- › Meets requirements of SAE 20R1, type EC, class D, standard wall

Packaging:

Available in 1 m lengths, cover is marked in 1 cm increments to facilitate customer-fit installation.
